This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

The following investigation, begun in 1906, is concerned with Gothic, Old and Modern Norse, Old English, Old Frisian, Old Saxon' Old Low German, Old High German, and Middle High German. It is not meant to furnish an etymological dictionary of words denoting parts of the body in these dialects, for it traces, not the origin of words, but the origin of certain ideas. Given a particular part of the body, the question is to find the primary meanings from which this idea developed through the various words used to express it. For example the idea 'hand' is found to go back to first meanings like 'grasp, clutch; hook, bend; projection; lump, bunch,' etc.

The words are arranged according to the respective parts of the body in the order given under the caption "Contents," first those of the head, then the upper and lower limbs, the trunk, the inner organs, pudenda, miscellaneous, including skin, blood, flesh, bone, hair. Under each part the words are grouped according to primary (generally descriptive) meanings, each paragraph forming an etymological unit.

The works from which material has been collected are mentioned in the bibliography.

The author is indebted to his esteemed friend and teacher, Professor Francis A. Wood, of the University of Chicago, for inspiration and generous criticism. A "(W.)" after an explanation indicates an explanation furnished by him from unpublished notes.

120. Heart

Thought, Craft

120:01. Goth. *hairto*, ON. *hjarta*, OE. *heorte*, OFris. *herte*, OS. *herta*, OHG. *herza*, etc.: Lat. *cor*, Gr. *καρδία*, *κραδίη*, *κῆρ*, Arm. *sirt*, OBulg. *srĭdĭce*, Lett. *sirds*, Lith. *szirdìs* heart, Herz, *sziřdis* Herz des Holzes, OBulg. *srěda* Mitte, Lett. *sērde* Mark, Kern des Holzes, Cymr. *cœidd* Herz, Mittelpunkt, Bret. *kreis* milieu, Skt. *çrad-dhā* das Vertrauen, *çrád-dádhāti* vertraut, glaubt, Lat. *crēdo*. Cf. Walde[2] 191, 199 with references.

Perhaps like Gr. *θῦμός*, a term descriptive of some human activity or feeling as expressed in Gr. *κέρδος* gain, profit, advantage, shrewd scheme or device, plan, craft, cunning, *κερδαλέος* shrewd, crafty, cunning, OIr. *cerd* Kunst, Handwerk, etc. (Schrader *KZ*.XXX, 474). This is quite probable if the term was first applied to human beings.

If, however, it was a term descriptive of the organ as seen in animals, then the primary mg. would be quite different.

Breast

120:02. OE. *brēost* breast, chest: mind, heart (not of the organ, but as the seat of thought and feeling). Compare the compounds *brēost-cofa* (breast-chamber) mind, heart, *brēost-hord* (breast- treasury) id., *brēost-sefa* (breast-thought: *sefa* mind, heart) id. For the primary mg. of *breast* cf. 99:05.

Inner Chamber
